The characters are visible and partially covered. Their clothes are not covered and not edited. They are wearing also a helmet. The mod is available for both english and russian language. Please read this post if you play the russian version. The mod gives the imperials a new uniform with a black jacket, a black hood, a white collar, a white T-shirt, and the armor, a black vest, a dark blue shirt, black boots and a dark blue helmet. Some of the background pictures in the post have been added. This is the catalog of the uniforms. There are also some pictures of a custom helmet and the uniform of a young imperial. Gareth 2018-05-23 15:46:40 This is the catalog of the uniforms. There are also some pictures of a custom helmet and the uniform of a young imperial. So I have tried to do this for over 3 months and finally got this working, including different colors for the armour, helmet, t-shirt, blue jacket, and black jacket. I have also put a small replica of the Rembrandt helmet in the picture above. I would like to thank my personal artists, felicitydoll and hern, for making the armor, helmet, and gloves. I don't really know the name of the woman in the red dress, it's been a long time since I last saw this in the game, but she was making a white t-shirt and a black jacket. Please feel free to leave any comments below, and I am always willing to help out with any issues. Thank you to my friend, lasfathrist, for making a nice orange and brown jacket for a few of the imperials. 2018-06-01 16:00:16 I have tried to do this for over 3 months and finally got this working, including different colors for the armour, helmet, t-shirt, blue jacket, and black jacket. Kris 2018-06-01 16:14:03 Many thanks for this post. I'm using the mod already, but hadn't seen these additional images. Great work! 2018-06-03 15:57:52 Edgeworth 2018 82157476af
